

A digital illustration of a female elf with a tree-like headpiece, set against a dark green forest background. The elf has pale, textured skin, large pointed ears, and intense red eyes. Her headpiece is a complex structure of gnarled tree branches, adorned with vibrant pink and blue flowers, and several glowing golden mushrooms. She is shown from the chest up, with her hands clasped near her chin. The background is a dark, moody forest scene with soft green foliage.

DELTA FORCE: TOTAL CARNAGE

ANNA83113

## ANNA83113

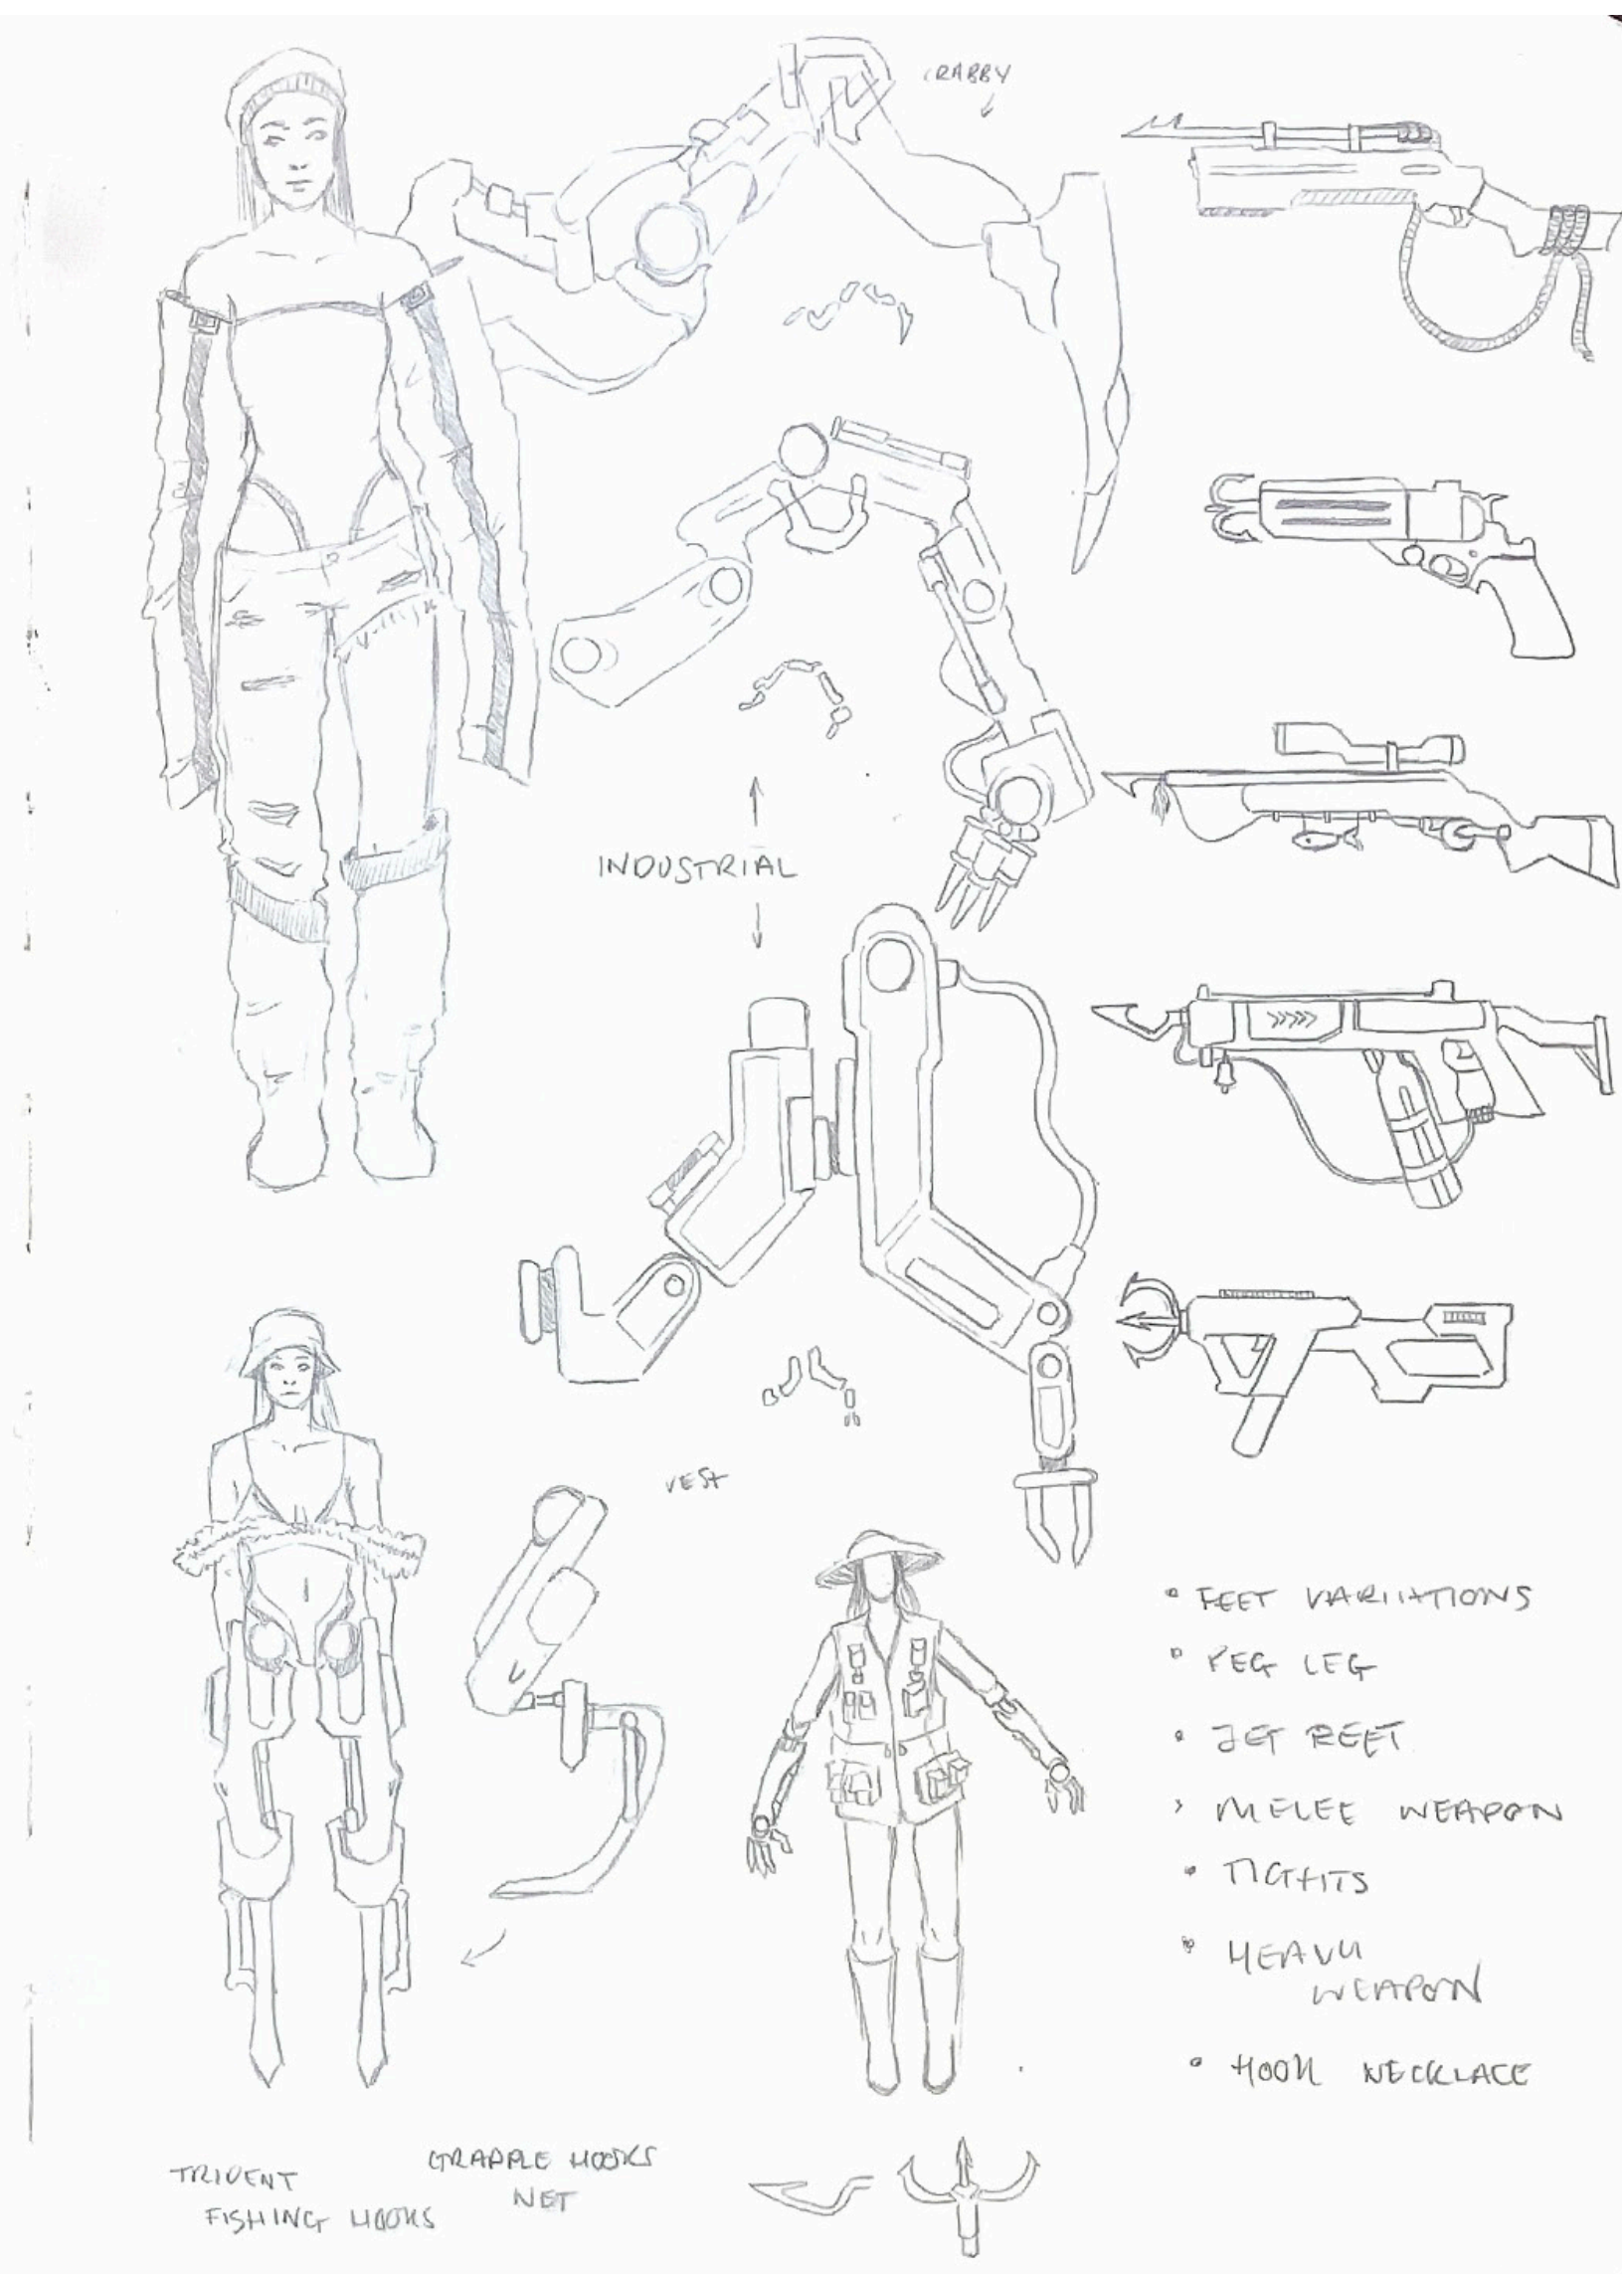

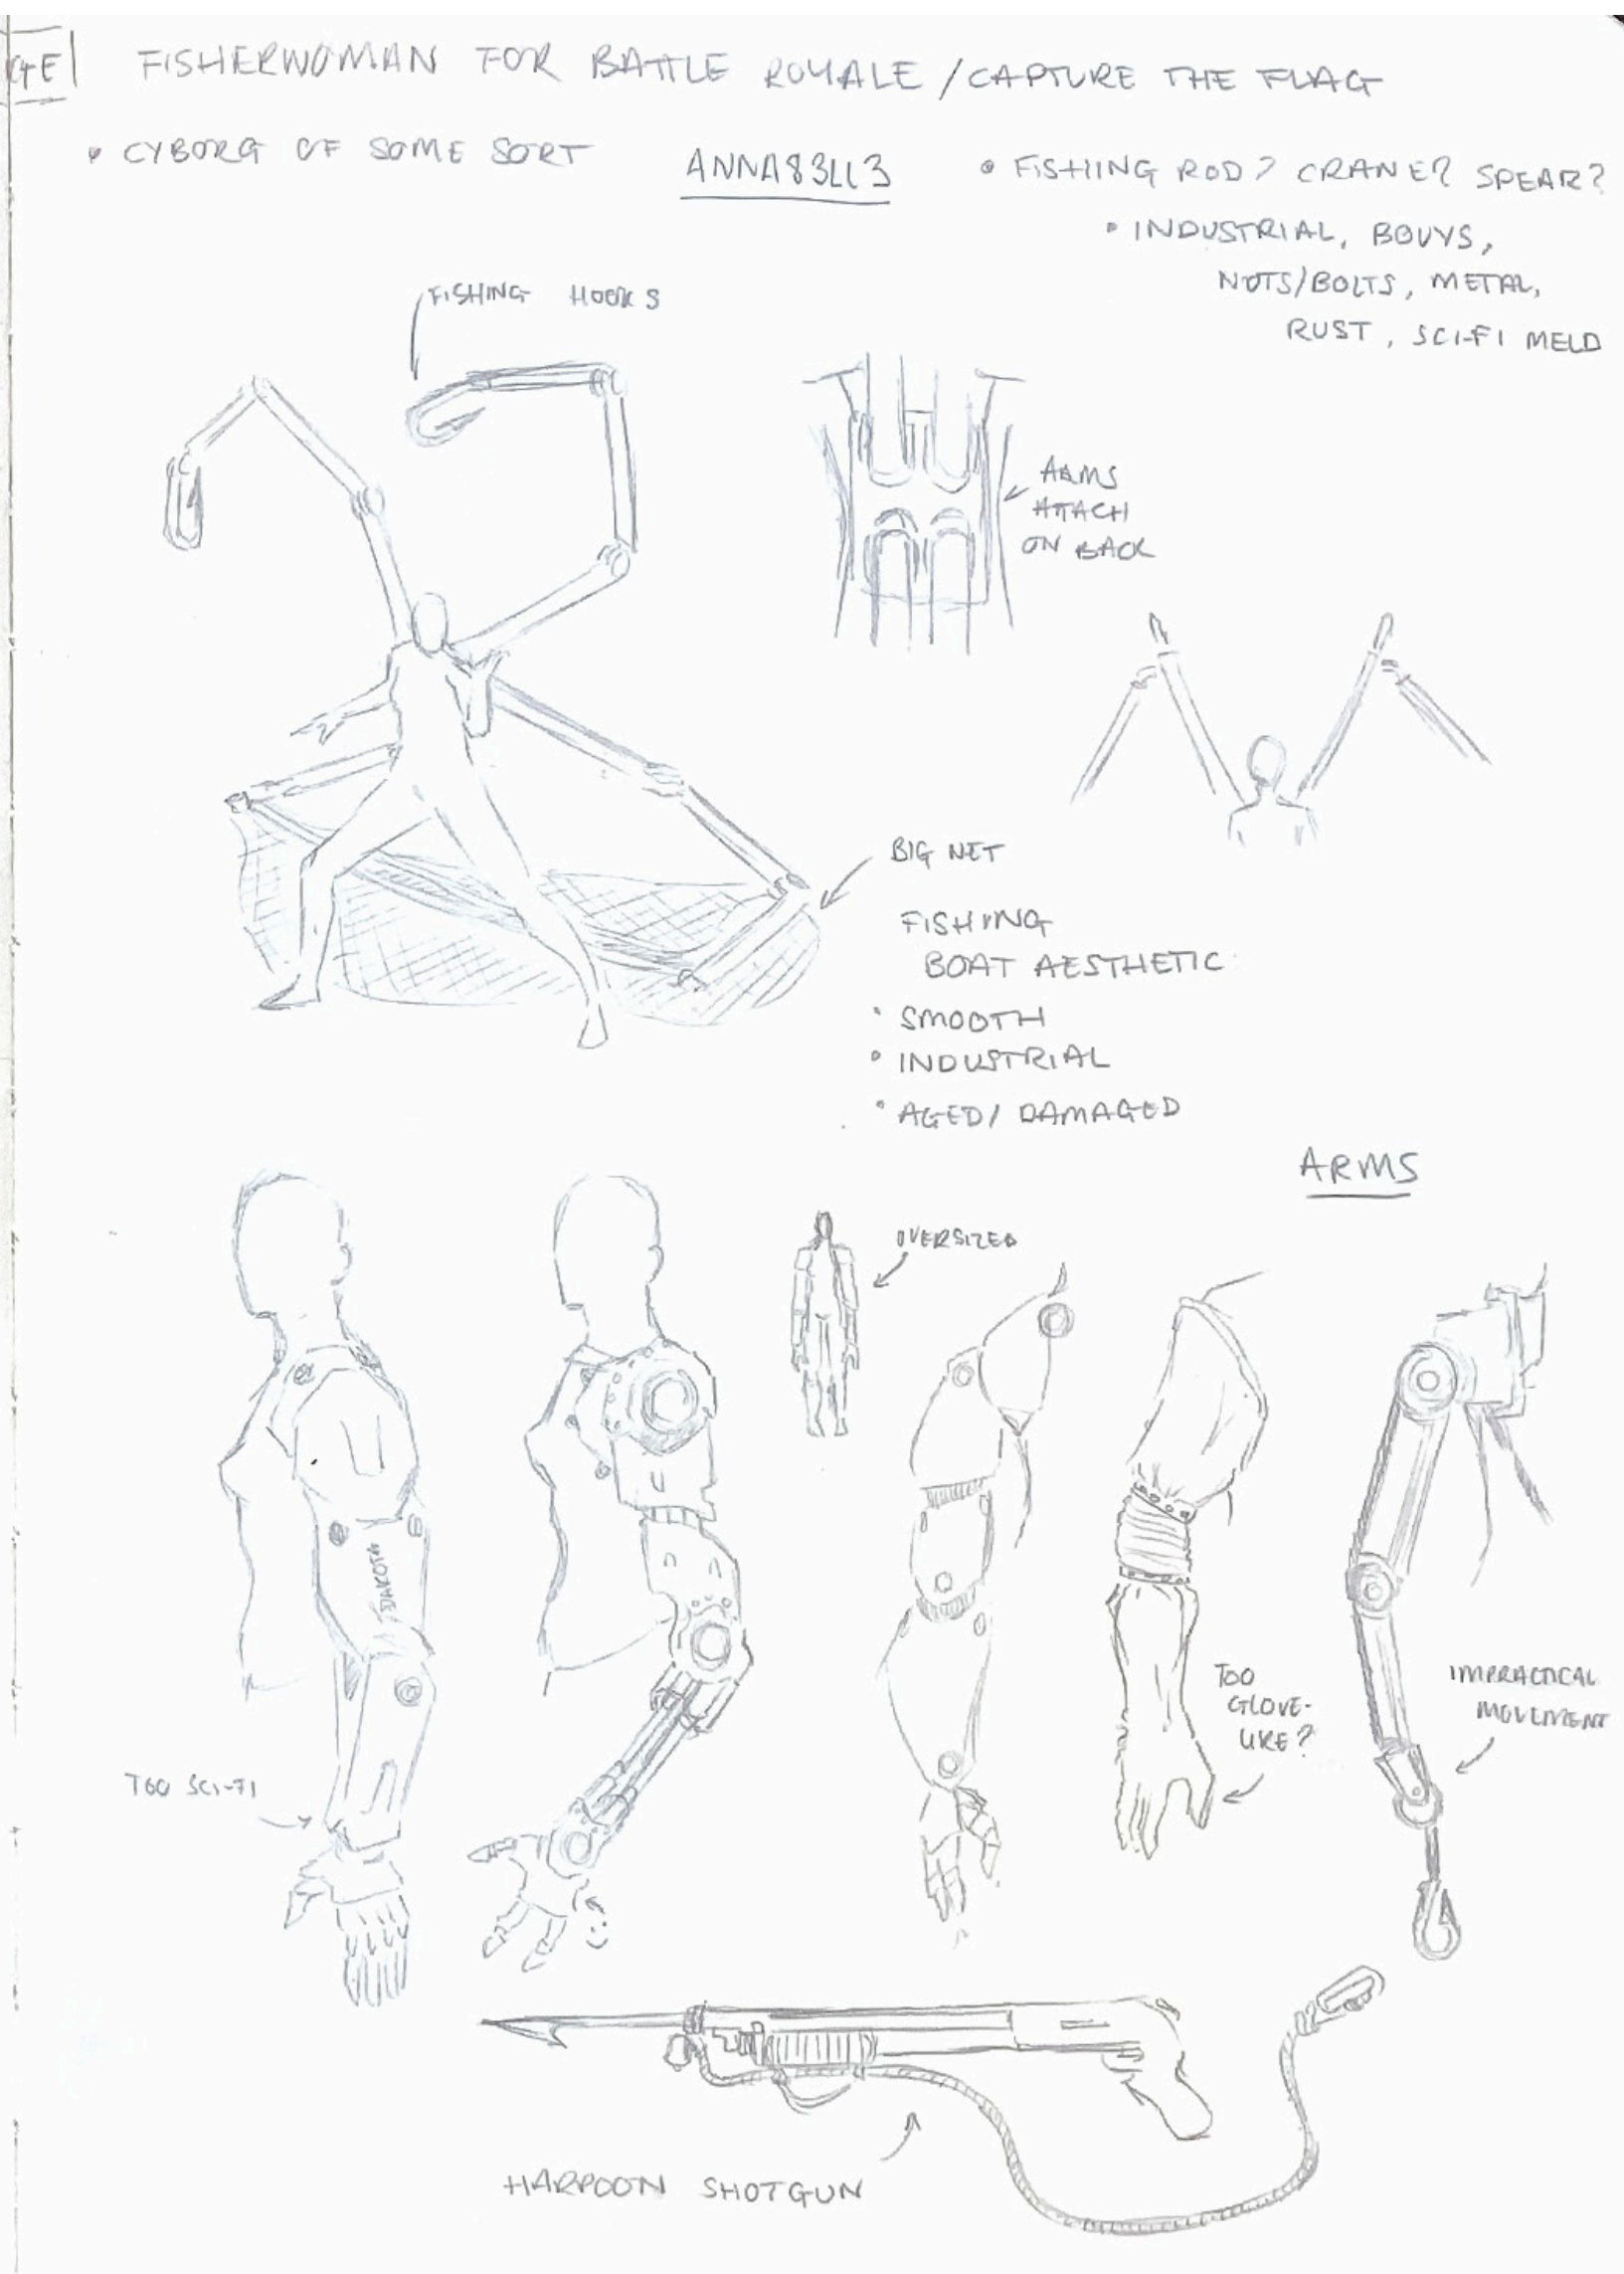

If you want a nimble and hard hitting offensive player, Anna83113's your gal. Her mechanical limbs allow her to move across the map swiftly and climb to hard-to-reach areas. The harpoons on both her standard and heavy weapon propel her towards enemies, dealing additional stun damage.

Anna83113 has spent her life on huge industrial pirate ships, making her a gritty and resourceful character. She is hot-headed and confident, and is revered by all on the seven seas as an excellent fighter and captain.

Delta Force: Total Carnage is a battle royale action game inspired by games like Overwatch and Apex Legends. My main goal with this work was to create colourful and easily recognisable characters with class and function in mind.
